Md. Zahid Fesabelilla 38<sup>th</sup> batch, CSE, AUST

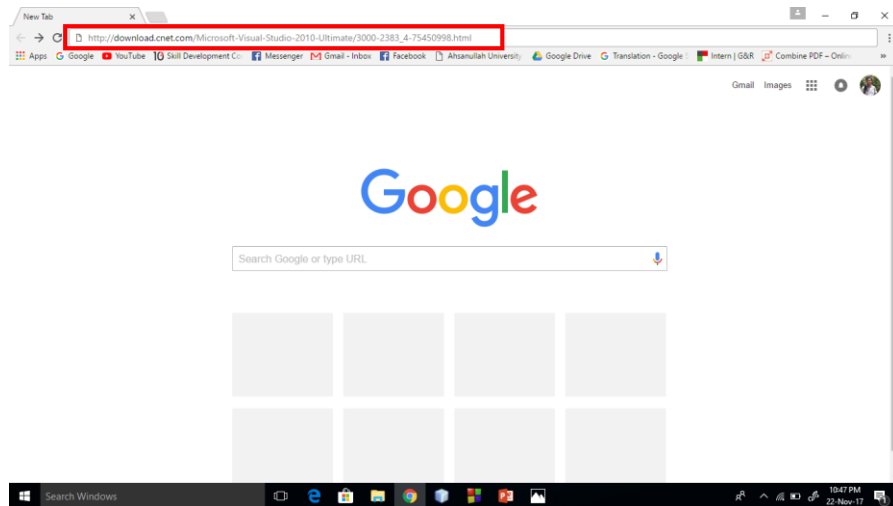

## STEP 1:

Download the setup file of “Visual Studio 2010”

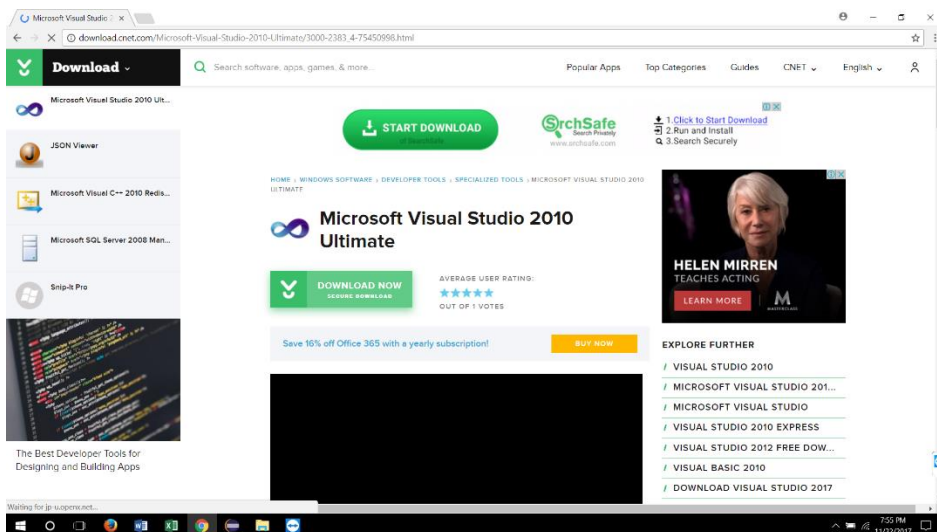

Download link: [http://download.cnet.com/Microsoft-Visual-Studio-2010-Ultimate/3000-2383\\_4-75450998.html](http://download.cnet.com/Microsoft-Visual-Studio-2010-Ultimate/3000-2383_4-75450998.html)

Product key: YCFHQ9DWCYDKV88T2TMHG7BHP

### 1.1. Go to your browser, and browse the link...

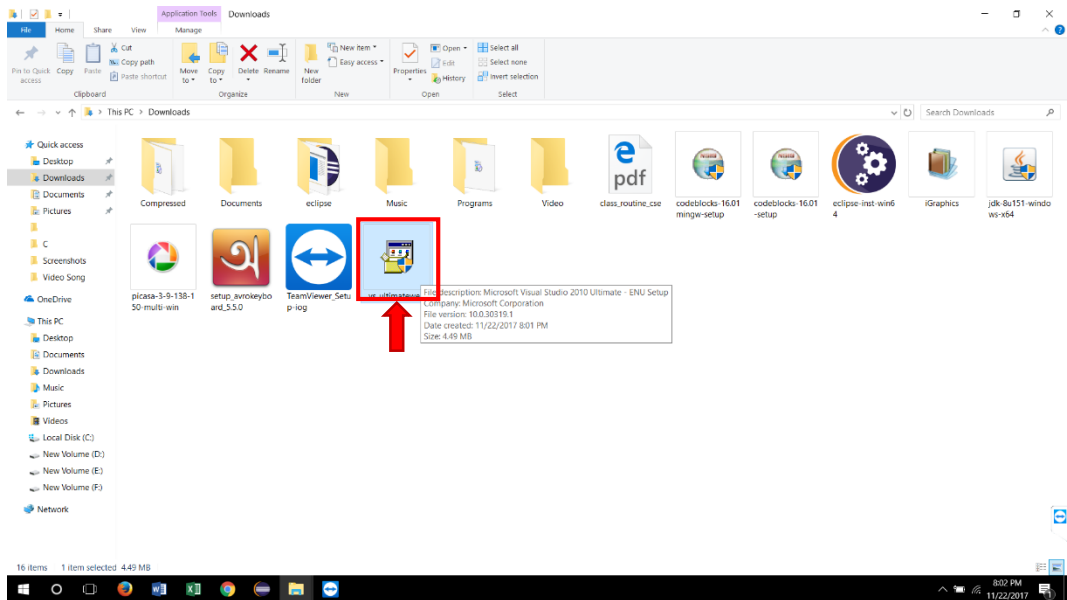

### 1.2. Click “Download Now” button...

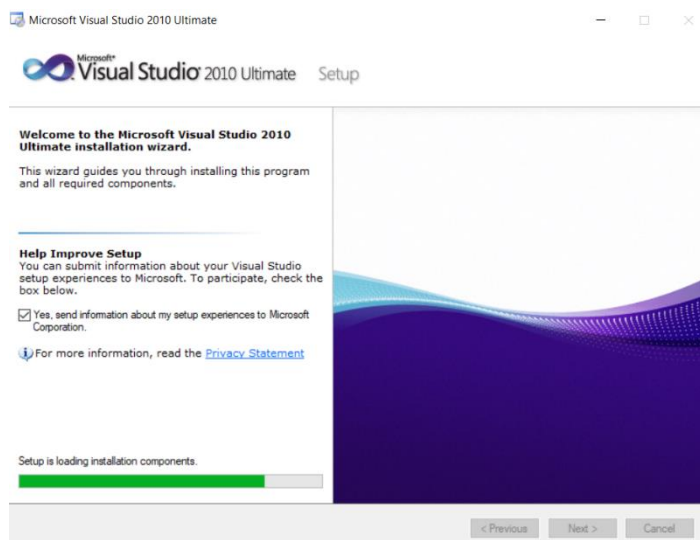

## STEP 2:

Open the installed file and follow up with the figures...

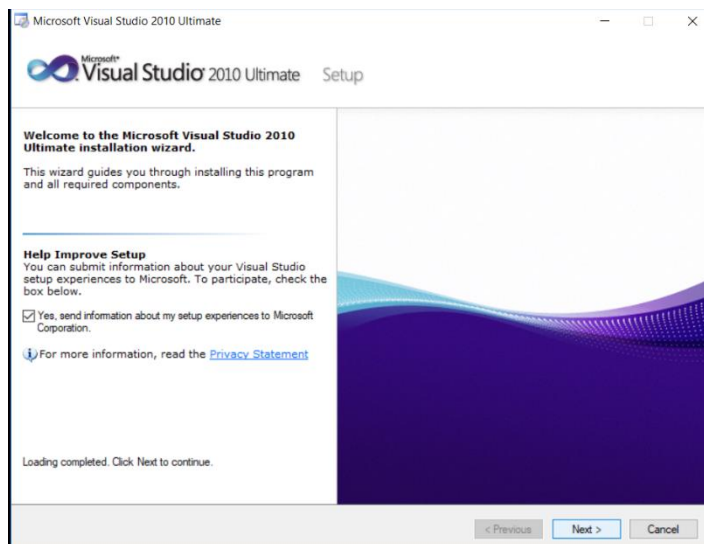

### 2.1. Open the installed file...

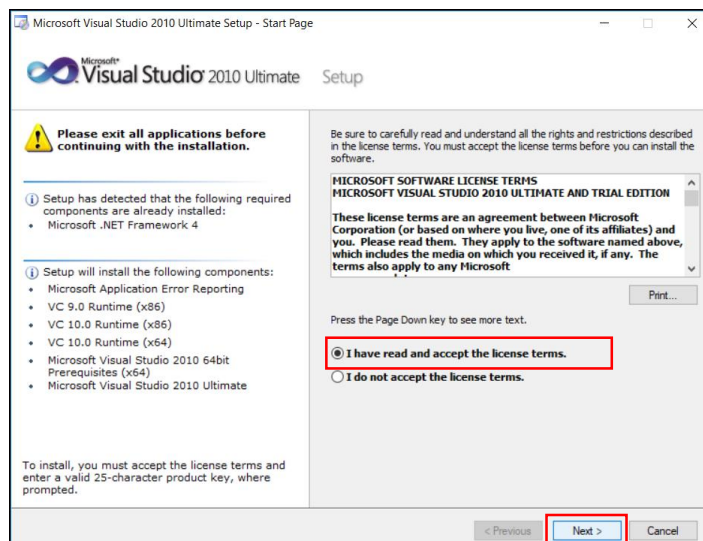

### 2.2. Now wait for a while...

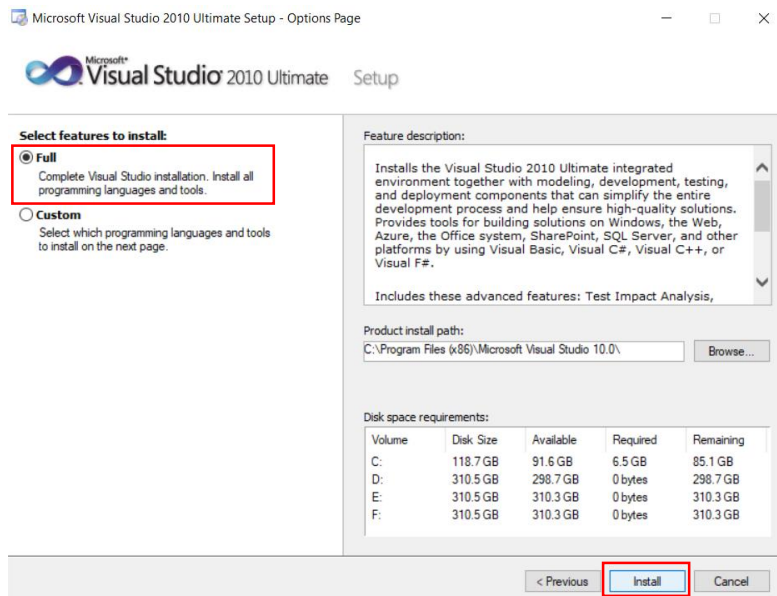

## 2.3. After loading, click “Next” ...

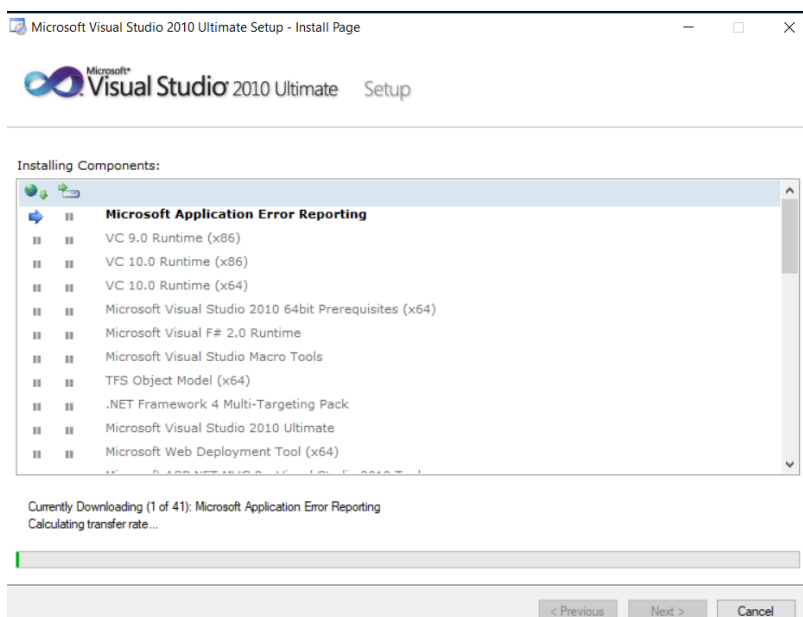

## 2.4. Select the ‘license agree’ term and click “Next”

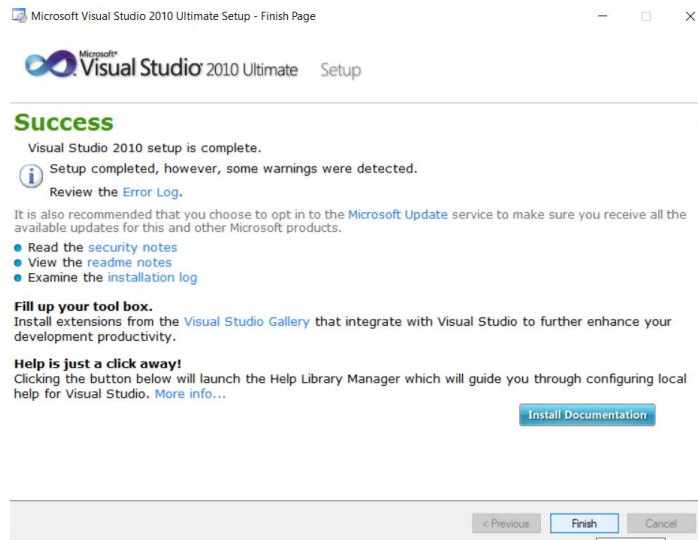

## 2.5. Select the “FULL” bullet and click “Next”

2.6. Some files will download and install. Wait until the download completed. It will takes a time. The number of files (here 41) will vary for your PC. if your PC contain among of this files, then that file will not be downloaded. After that, click “Next”.

2.7. After clicking “Finish”, your “Visual Studio 2010” will successfully installed.

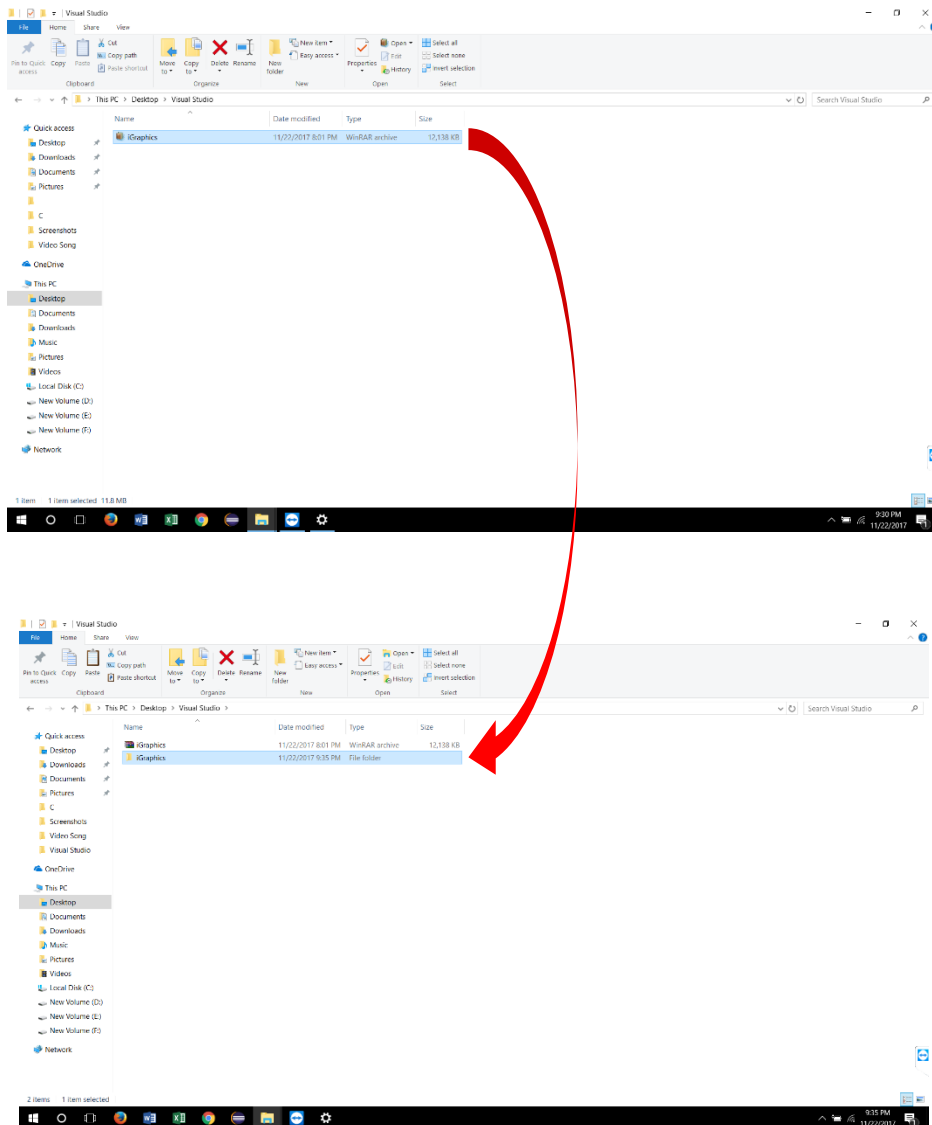

To run “Visual Studio” successfully, you need some library files. That procedure are given in the next pages.

### STEP 3:

Download library files from the given link.

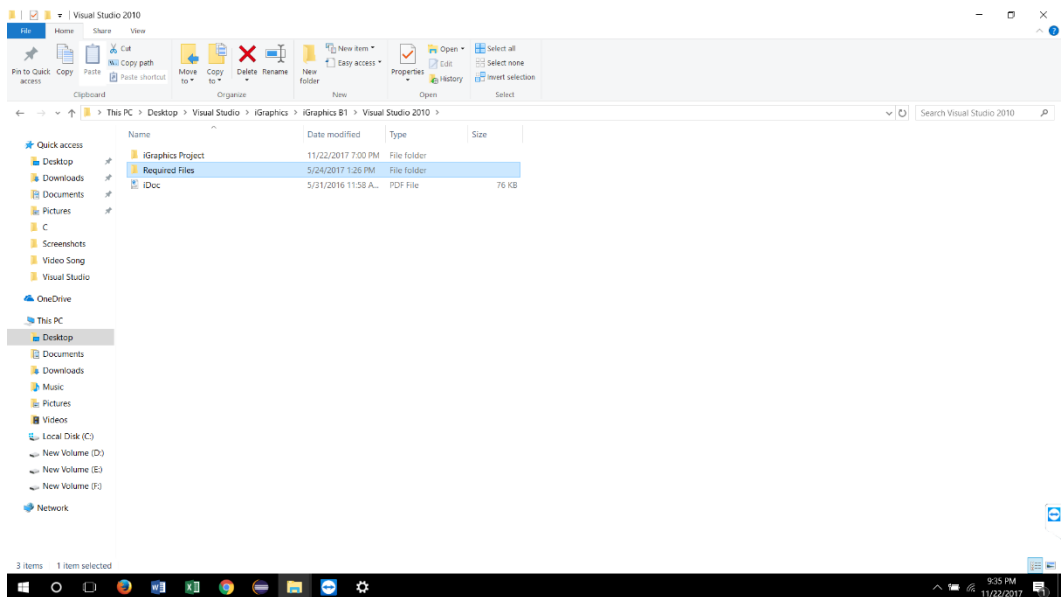

<https://drive.google.com/open?id=1ypqzjFu3gUN9lFXeQuseTnPpLbsgbyvD>

#### 3.1. Download the file, Unzip that and open it.

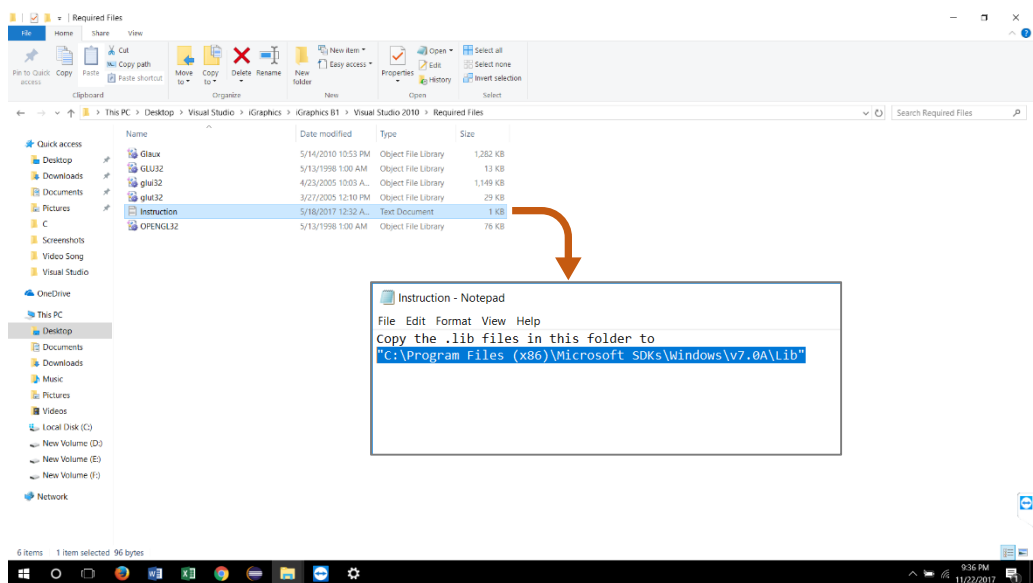

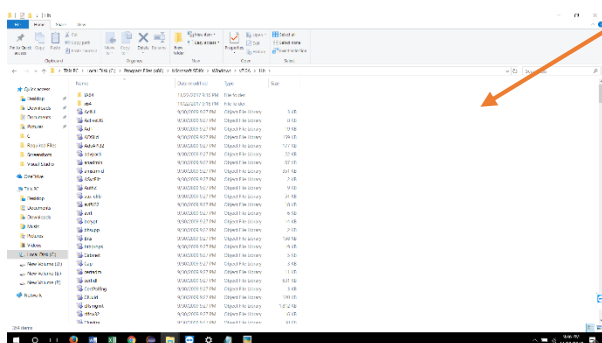

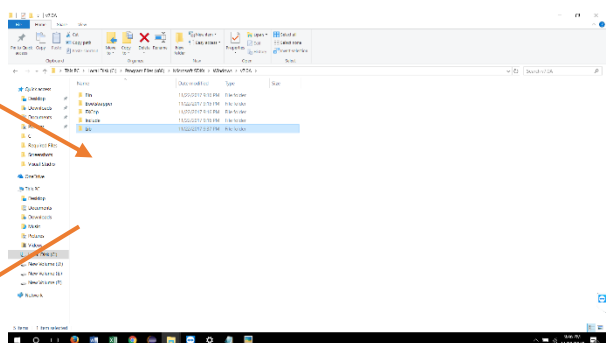

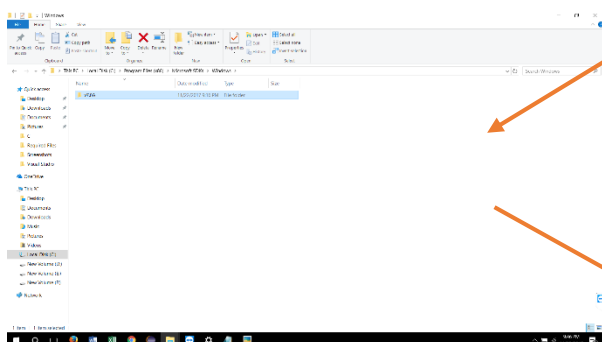

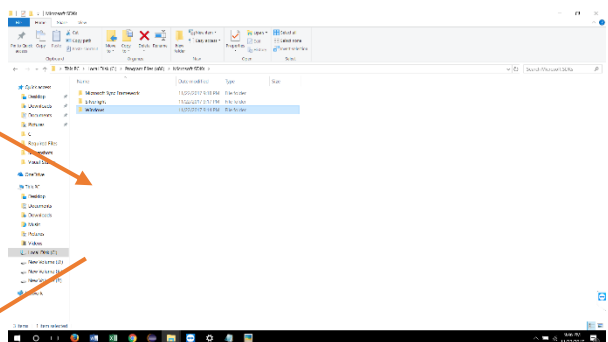

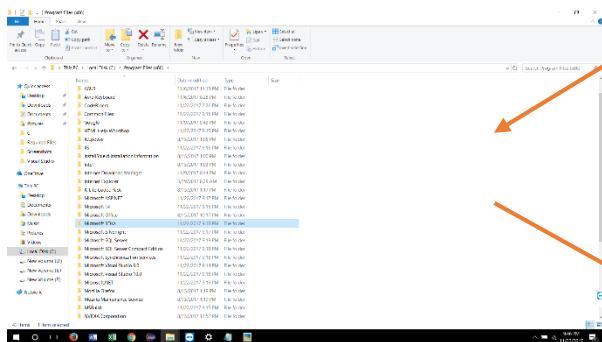

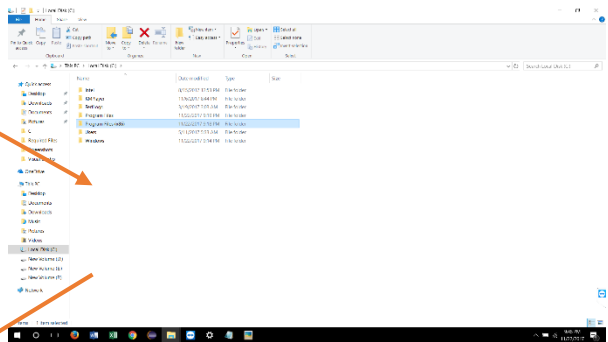

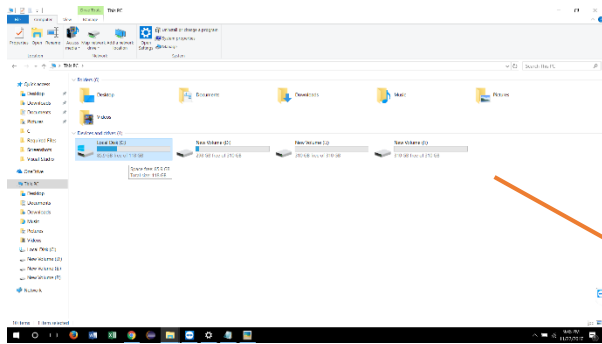

### 3.2 Open the “Required files” folder

### 3.3. Read “Instruction.txt” file

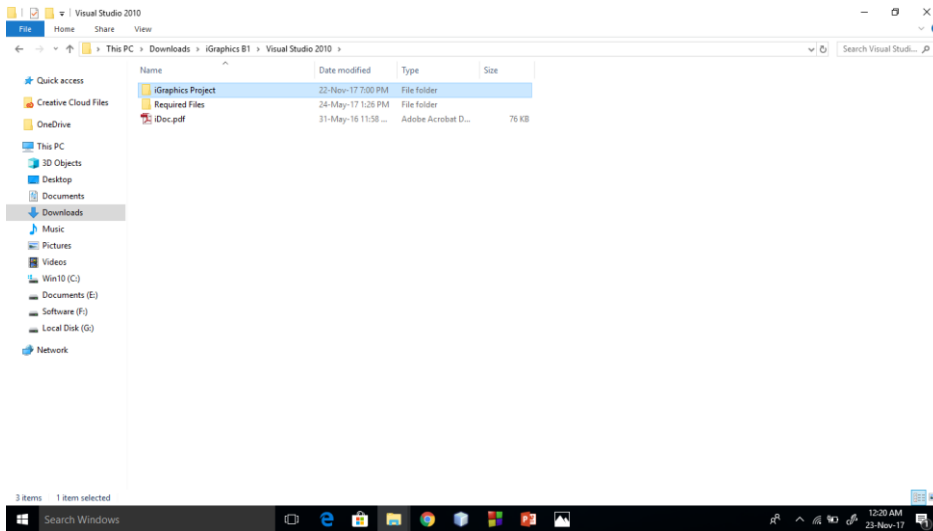

**3.4.** Now copy all the library files to the “lib” folder as instructed in “instruction.txt” file.

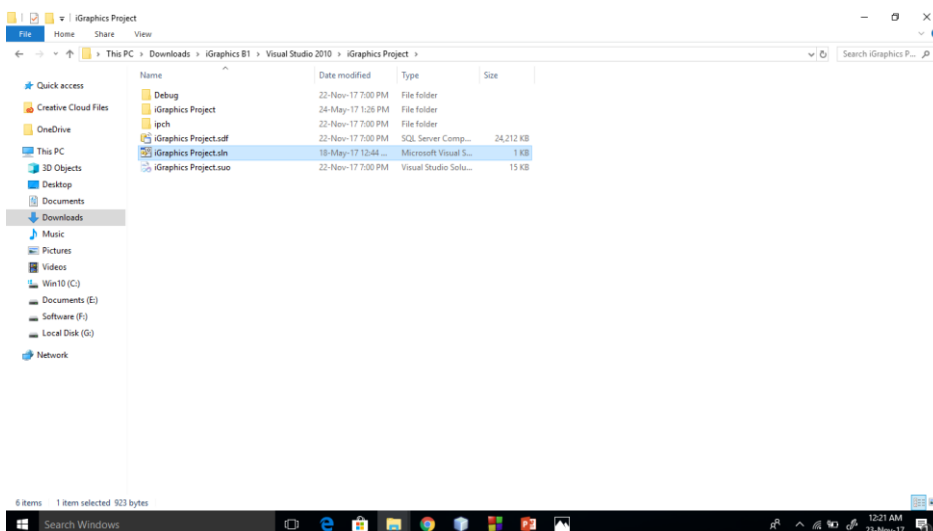

## STEP 4:

Lets open our (.sln) file on “Visual Studio 2010”

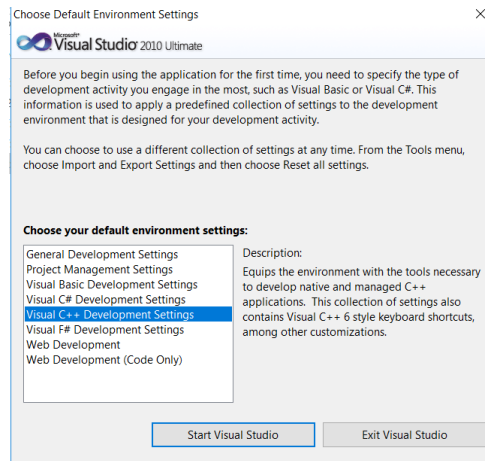

### 4.1. Go back, and select “iGraphics Project”

### 4.2. Open the (.sln) file.

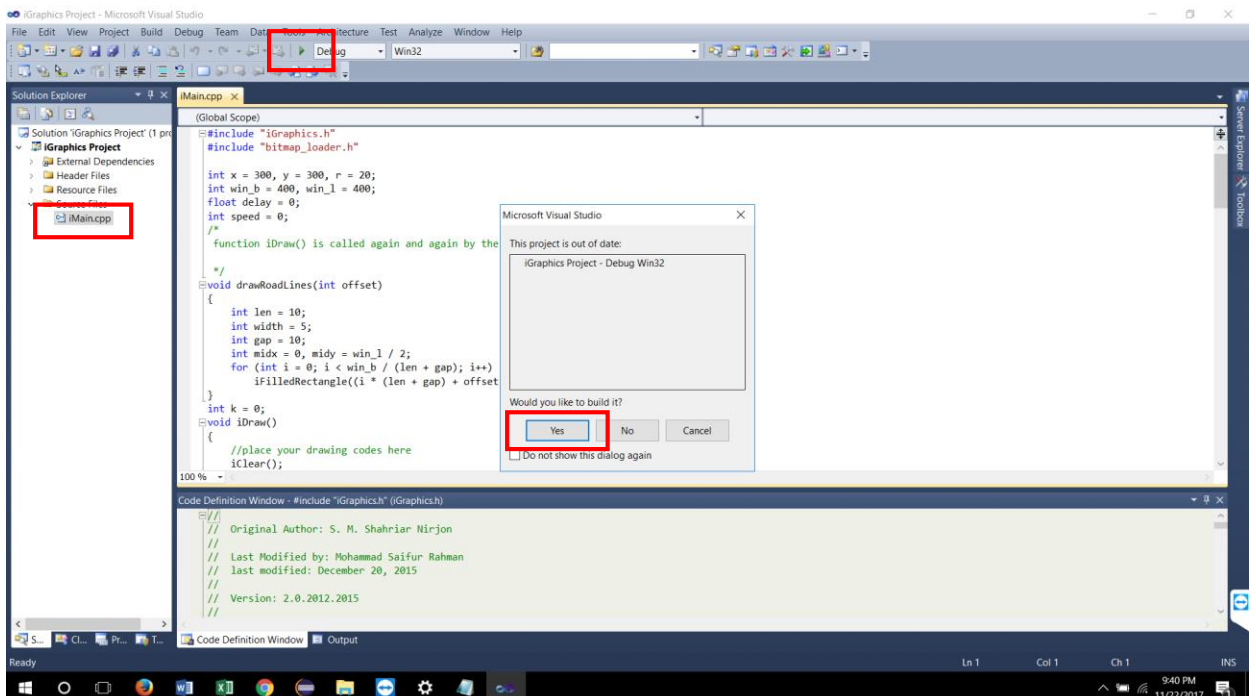

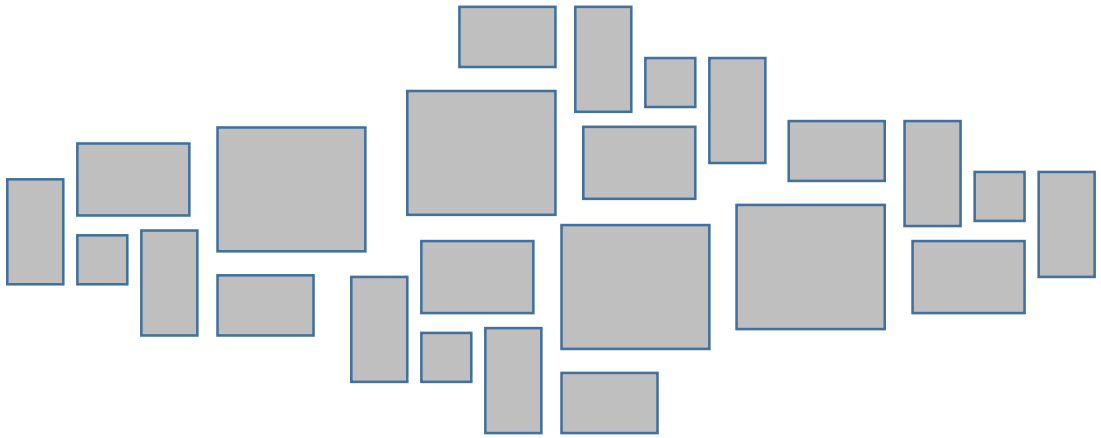

#### 4.3. Now select “Visual C++ Development Setting” and click on start button.

#### 4.4. Finally we are in the code.

1. Open “iMain.cpp” file
2. Press (ctrl + s) to save.
3. Click on “Run” to run this file.
4. Click “yes” on that pop-up box.
